

Application Installation and Licensing Procedure

1. Download the ZIP package from the provided link.
2. Extract the contents of the ZIP file to a desired location.
3. The extracted package contains the following files:
 - Application Installer
 - Release Notes (Markdown file)
4. Launch the installer by double-clicking the setup file.
5. The installer is digitally signed by IIC, ensuring the authenticity and integrity of the installation package.
6. Review and accept the License Agreement when prompted during the installation process.
7. Follow the installation wizard by clicking **Next** through the subsequent steps and then click **Finish** to complete the installation.
8. After the installation is complete, launch the application.
9. If this is the first time the application is being executed, the **License Activation** dialog will be displayed automatically.
10. Select the **Generate License Request File** option and choose a location to save the license request file.
11. Send the generated license request file to IIC.
12. Upon receipt, IIC will generate a corresponding license file and provide it to you.
13. Launch the application again. The **License Activation** dialog will be displayed.
14. Select the **Import License File** option and browse to the license file received from IIC.
15. Once the license file is successfully validated, the application will open normally.
16. For all subsequent executions, the application will start directly without displaying the license activation dialog, provided the license remains valid.

Note: Please retain the license file for future reference and ensure that the system configuration remains unchanged, as licensing may be tied to specific machine details.
